Projects

Udemy Clone
Built a responsive Udemy clone using HTML and CSS, replicating the layout and design of the platform. Focused on creating a clean, user-friendly interface with mobile-friendly features and optimized styling for various screen sizes.

HTML, CSS

Actodo
Actodo is a task management app built with React, featuring user login/signup, task creation, and management. The app provides a responsive and user-friendly interface for organizing tasks, with local state management for smooth interactions.

🔗 https://github.com/Suji-4/actodo

Amazon
Built with the MERN stack, this Amazon Clone allows users to browse products, manage a shopping cart, and make secure payments using Stripe. It features user authentication, a product database with MongoDB, and state management with Redux, demonstrating full-stack development skills.
